

Jesús Lorenzo Lucas

Frontend Developer

jelolu1@gmail.com

Leipzig, Germany

EXPERIENCE

July 2023
– Now

Frontend Developer

Safety io (MSA) · Berlin – Germany

- Build and maintain an Angular SPA for real-time tracking and control of connected IoT safety devices
- Lead the web platform's contribution to a cross-team design system, partnering with designers and developers to standardize shared components across multiple products
- Own features end to end — from defining OKRs and refining epics to shipping to production
- Safeguard releases by writing unit and e2e tests (Jest, Cypress)

Sept. 2021
– Feb. 2022

Teaching Assistant – Embedded Systems Lab

Fachhochschule · Dortmund – Germany

- Designed and ran a hands-on course on programming an embedded-systems robot for 30+ students
- Introduced students to AWS Greengrass, IoT concepts, and Python and C++ programming
- Assessed student progress through structured evaluation sessions

ESP32

AWS Greengrass

IoT

Python

C++

Feb. 2019
– Dec. 2019

Intern software developer

Siemens Gamesa · Benisanó – Spain

- Built a SPA to automate testing of electrical wind-turbine control cabinets, replacing a manual, error-prone process
- Deployed the application to production in a live factory environment
- Provided day-to-day support on the testing line to keep the process running smoothly
